

ALPS Risk/Benefit Public Announcement

Researchers at the Medical College of Wisconsin are studying the best way to

What is the benefit of this research?

This study may help others in the future. One type of heart rhythm medicine used in CPR could have better results than the other. There is potential that a person in this study could have an increased chance of survival with one of the medicines, but that benefit is not guaranteed. People will not receive money for being in this research study and it will not cost a person anything. All information obtained from this study will remain private and confidential. The findings from this study will be presented at meetings and published in scientific journals, but information that could identify a person will not be used.

If you are an adult in Milwaukee County and have cardiac arrest, you may be in this study.

Cardiac arrest is an emergency and the paramedics have to act quickly to treat a person. This means that there is no time to get permission. People with cardiac arrest
